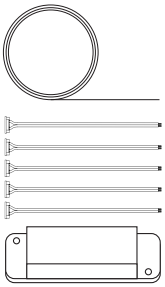
HANECO LIGHTING LED INSTALLATION GUIDE

FLEXION 75W IP20 SERIES

PRODUCT CODE: FS75W5MWW-IP20 / FS75W5MNW-IP20 / FS75W5MCW-IP20

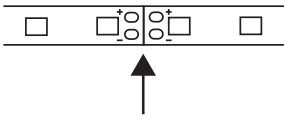
Product should be installed by a qualified electrician.
Prior to installation ensure power is off at fuse box to prevent electrical shock.
Flexion strips can be connected up to a maximum of 8m length. If a longer length is required contact Haneco Lighting.

Contents



Shorten strip

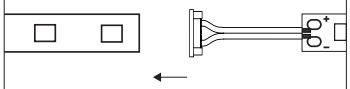
Cut strip to length at indicated intervals (every 100mm) using a sharp knife or scissors . Ensure care is taken to avoid damage to terminals.



Extend strip

Solder Supply Connection to end of one strip being careful to observe circuit polarity

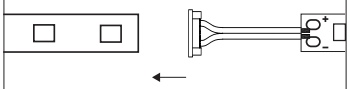
Press Supply Connection onto end of other strip.



Join intermittent strips

Solder Supply Connection to end of one strip being careful to observe circuit polarity

Press Supply Connection onto end of other strip.

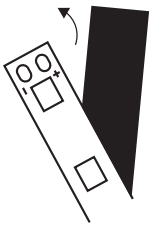


Install strip

Ensure that surface is clean and dry by using an isopropol alcohol

Suitable for mounting on normally flammable surfaces

Peel off backing tape and fix into position



Connect strip to 24VDC constant voltage driver. Fix driver to surface with screws.
