

Sunmax

HANECO
IDEAS THAT SHINE

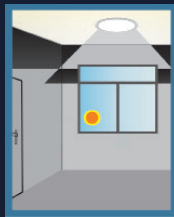

Automatic daylight harvesting

- Sunmax responds to the level of sunlight and automatically dims the light fitting to save energy.
- As the daylight increases, the sensor compensates by reducing lighting costs by up to 20%, eliminating excess power use and saving you money.

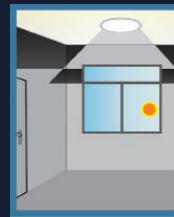

Sunmax smart sensor in mounting bracket

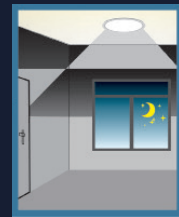

8am
output 80%

12am
output 10%

5pm
output 60%

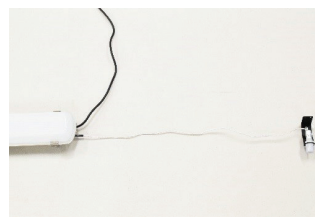

9pm
output 100%

- One sensor can dim multiple lights, suitable for zone control
- Ideal for warehouses, factories, workshops
- Compatible with any 1-10V dimmable LED light fitting
- Direct mount on Highbay light or remotely surface mount
- Dimming range: 10 – 100%
- Detection angle: 90°
- Simple screwdriver adjustment control
- IP20 suitable for indoor use
