

CENTAURI Downlights

.....

High performance LED lights for retail & commercial uses

.....

Fantastic flexibility

The CENTAURI range features dual intensity and Tritone warm to cool colour temperature selection so that each light presents 6 options to use as circumstances or requirements change.

Three sizes

There are three sizes and dual intensities of CENTAURI with large face trims to fit 105-135mm, 170-180mm and 185-215mm cutouts. They come in, respectively, 10/15W, 15/25W and 20/30W.

Adaptable

Not only can these fittings be adapted to suit changing displays, the 20/30W model can adapt to cutouts up to 250mm with a handy 280mm adaptor plate.

Easy to fit

With its low profile and flex and plug the CENTAURI is simple to install. Eligible for rebates under VEET, REES and IPART.
