IDEAS THAT SHINE

Bestselling Downlight Range

Haneco has downlights that suit all tastes and applications

Comprehensive Range

Haneco has more than 20 types of downlight with over a hundred models to choose from, so you are sure to find exactly what you want.

Easy to Install

With plug and play, inbuilt driver and rubberised clips to reduce damage to your cutout on many models, Haneco's downlights are low installation hassle. And if you have trouble with a cutout, adaptor rings for our popular lines have you covered.

Low Glare

We offer fixed and adjustable downlights with opal lenses or clear lenses with reflectors. What they all have in common is good optical control and low glare.

Economical

All of our LED downlights outperform outdated conventional downlights with superior lumen output per watt, meaning they use much less power. They also have a longer life with less maintenance.

Most Popular Downlights

VIVA - Bestselling general purpose

The opal flush lens VIVA range creates no problems with insulation and has a 1.2m flex and plug for easy installation. They are dimmable and have a long lifespan (50,000 hrs). A great first choice for trouble free downlights.

VIVA Multi - Switchable colour temperature

VIVA Multi's Tritone allows you to choose from three colour temperatures – convenient for both contractors and customers. And you can choose from three clip on trim finishes if white doesn't appeal.

CORONA - Durable with variety of trims

With a five year warranty and solid diecast aluminium body, this opal flush lens downlight is guaranteed to last the distance. Square trims and circular adaptor rings are available in white or brushed nickel.

AURORA 700 & 1000 - Slimline 9W or 12W

The slim line AURORA 700 & 1000 ranges have a thin 36mm profile to suit narrow ceiling spaces. They have a recessed opal lens and you can choose from black, white or silver finishes. There are 9W and 12W switchable colour temperature Tritone models available.

STELLAR - High powered adjustable range

The STELLAR range of adjustable (30°) downlights has deep faceted reflectors, clear lenses and good glare control. They come in various strengths from 15 through to a substantial 40 watts for big spaces.

DETAIL - Aimable narrow beam

Safe with insulation (IC-4) and with some models featuring sealed ring housing, this adjustable clear lens downlight has excellent efficiency, a narrow 60° beam angle and ticks all the boxes for energy saving.

HANECO
IDEAS THAT SHINE

Light up living

Downlights for any Purpose

Haneco downlights are in homes & businesses nationwide

Bathrooms & kitchens - Freedom to be creative

The moisture resistant rating of most models make them ideal to use in wet areas such as bathrooms. They have excellent colour rendition for task lighting in kitchens and come in a range of colour temperatures to suit decor.

Outdoor lifestyle - Expand your living space

And don't forget the covered deck for those who like to seamlessly extend their living space. Downlights let you see exactly what you are doing on the BBQ and make the outdoor lifestyle easy to enjoy.

Hotels and restaurants - Reliability where it counts

A powerful STELLAR is at home in a shopping mall or a hotel foyer and the sheer variety of dimmable downlights we offer are perfect for creating exactly the right atmosphere in cafes and restaurants.
