IDEAS THAT SHINE

Indoor LED Batten Range

Tritone warm to cool VISTA and contemporary style BLADE

With 2 distinct styles in a full range of sizes backed up by an array of smart features, you are sure to find a Haneco indoor batten that suits.

Classic Design Tritone VISTA

Tritone selection of colour temperatures across the whole VISTA range means you can switch between warm, neutral and cool white. Ecoswitch models, which you can switch between full and half power, double your options to give you 6 settings on the one unit. Even more options are available with smart add-ons. Intellisensor is a programmable occupancy sensor and Emergency is a battery that provides 3 hours of usable light during blackouts.

Sleek & Modern BLADE

The super slim BLADE can both modernise the look of a space and deliver energy savings without compromising light output.

Independent Approval

VISTA and BLADE are approved for use in food preparation areas by HACCP. Several models of VISTA are included in the government energy savings schemes VEET, REES and IPART.

Superior Technology

All our LED battens deliver much better energy efficiency than fluorescents and have at least five times the lifespan. Not only that, they contain no mercury and don't shatter.

VISTA

Conventional and economical

Colour Switchable Tritone

- Outperforms fluorescents and ideal for retrofits
- Approved for use in food preparation areas by HACCP
- 5 year warranty
- **Ecoswitch** allows you to switch to half power
- **Intellisensor** is a programmable sensor that dims the light when no-one is around
- **Emergency** Ni-Cd batteries keep the light on at a reduced level for safety during blackouts
