ATMOS™ Series

POWERPOINTS, SWITCH INTERFACES AND ISOLATORS

ATMOS™ Series

POWERPOINTS, SWITCH INTERFACES AND ISOLATORS

Simple installation

✔ Suitable for retro-fitting or new builds

✔ Common industry standard footprint for ease of retro fit.

✔ Multiple knock-outs for flexible cable entry points

✔ Large terminals and combination head screws for fast fit-offs

Weatherproof Powerpoints

Discover the versatility and durability of our Weatherproof Powerpoint Range, designed to withstand demanding environments while ensuring safety and style for both residential and commercial applications.

Key features include:

Versatile Configurations: Choose from single, single square, double, or double with an extra switch, tailored to your needs.

Exceptional Protection: Rated IP54, eliminating the need for additional plastic covers, making it perfect for "ZONE 2" areas like pools, wet areas, and ponds, as per AS/NZS3000.

Enhanced Safety: Features sealed safety shutters and UV-stabilsed materials to prevent discoloration and maintain durability over time.

Effortless Installation: Includes multiple mounting options, colour-coded terminals for easy identification, and back mounting boxes with 20mm and 25mm plain entries, supporting various installation locations.

Seamless Design: Matches the styling of the Atmos range of weatherproof switches, providing a cohesive look across all installations.

Residential   Multi-Residential   Commercial   Industrial

Soft touch siliconised Switches
for Non-Slip Grip

Sturdy Sliders for comfortable
and durable operation

Four 25mm plain, and one 25mm
screwed entry as well as two 25mm
rear entry cut outs and one 25mm
push out for back wiring.

IP54

10A rated

Safety Shutters

Single pole two
way with looping
terminal

Ergonomically angled
screw terminals with
deep carburized steel
screw heads

Back box is common with
Clipsal WSC227/2 switched
sockets.

Raised insulation barriers
for extra protection
against copper exposure
and arcing

Easier to access
terminals, faster
to fit-off

Large terminals to
accommodate
up to 4 x 2.5mm2 cables

Co-injection gasket and
a mechanism shroud for
additional protection

Weatherproof Switch Range

Introducing our Weatherproof Switch Range, designed for reliability and durability in both residential and commercial environments. Rated at 16A 250V~, these switches are engineered to withstand tough conditions while maintaining exceptional performance and style.

Key features include:

Versatile Options: Available in single and double switch configurations with a heavy-duty mechanism and secure screw fittings.

Durable Construction: Made from UV-stabilised polycarbonate to prevent discolouration and ensure longevity in outdoor conditions.

Enhanced Protection: Featuring an IP66 rating, these switches provide superior resistance to water, dust, and other harmful elements, making them perfect for outdoor and challenging environments such as gardens, carports, workshops, and building exteriors.

Practical Design: Includes back mounting boxes with 20mm and 25mm plain entries to accommodate various installation requirements and terminals that support looping to other devices or side-by-side installations.

Seamless Aesthetic: Styled to match the Atmos range of weatherproof powerpoints, ensuring a cohesive look across your installations.

Whether for damp, dusty, or exterior spaces, this range delivers the ultimate combination of functionality, durability, and style.

High-Performance Weatherproof Isolators

Engineered for industrial and demanding applications, the Weatherproof Isolator Range delivers top-tier performance and reliability with robust construction and enhanced safety features.

Key features include:

Superior Protection: With a high IP66 rating, these isolators guard against water, dust, and other harsh elements, ensuring dependable operation in challenging environments.

Enhanced Security: Pad-lockable in the off position (suits 6mm shackle) for added safety during maintenance or downtime.

Durable and Reliable: UV-stabilised materials prevent discoloration, and switches are mounted on a stable base for long-term durability.

Simplified Installation: Equipped with multiple mounting facilities, color-coded terminals, and entries including 4 x 25mm threaded and 2 x plain reducers (25/20), accommodating various installation needs.

User-Friendly Design: Covers are secured with fast-action retention screws for quick access, while earth and neutral cables are firmly secured with two screws on both line and load sides.

Peace of Mind: Backed by a 5-year warranty, offering confidence in every installation.

Residential   Multi-Residential   Commercial   Industrial

Entries: 4 x 25mm threaded.
2 x 25mm entry on rear.
