Voice Control Using My KASTA Gateway

Control your KASTA smart home devices with Google Assistant or Amazon Alexa.

For example:
"OK Google, set living room lights to 50%."
"Alexa, turn on the light."

You will need to have a Google Home or Amazon account, and have downloaded and signed in to the latest version of the Google Home or Amazon Alexa app. For more information about using voice control with KASTA, visit kasta.com.au/knowledge

Warranty

KASTA Technologies warrants this product against defects in manufacture and workmanship for a period of 36 months from date of purchase. Warranty does not include damage or loss arising from incorrect installation, operation or maintenance of this product, damage caused through modification, or incorrect installation.

9.

Warranty cont...

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if goods fail to be of acceptable quality and the failure does not amount to a major failure. Any claim under this warranty must be made within 36 months of the date of purchase of the product. Refer to our website for terms and conditions and warranty claims.

Wi-Fi is ready to set up using the app and EZ mode.
- **Slow blinking red (1 blink/second)**
Wi-Fi is ready to set up using the app and AP mode.
- **Solid blue**
Bluetooth is connected.
- **Blinking blue**
Bluetooth is ready to connect.

Installation

1. Unpackage gateway carefully and dispose of the packaging material thoughtfully.
2. Place your gateway in a desired location. Ensure there is a powerpoint no less than 1m away and location of the gateway and is within range of your home Wi-Fi and the signal is strong. Place the gateway at least table height for better signal reception, away from damp or explosive environments.
3. Plug the micro USB plug into the micro USB port. Ensure secure connection.
4. Plug the USB plug into the AC/DC power adaptor. Ensure secure connection.
5. Plug the AC/DC power adaptor into the power outlet.

Connection Diagram

Before You Start

- You will need to have a smartphone or smart device connected to your Wi-Fi network with access to the internet.
- You will need to know the Wi-Fi name (SSID) and Wi-Fi password for your network.

Unsure of your Wi-Fi name or password?

- Check if the base of your Wi-Fi modem/router has a sticker with your Wi-Fi details. This should be supplied by your ISP (internet service provider).
- Check if your ISP has supplied you with a fridge magnet with your Wi-Fi details.
- If you are unable to find your Wi-Fi network name or password, please contact your ISP for assistance before getting started.

Connect to your Wi-Fi

Ensure your mobile device is connected to your 2.4GHz WiFi network. Your mobile device and your smart device/s needs to be within good signal strength range of your WiFi router.
For IT protected WiFi network, please do not block port 8886 which will be used for Kasta gateway communication.

Download the KASTA App

If not already installed, scan the QR code below to download the KASTA app and create a KASTA account.
