

Bestselling Downlight Range

**Haneco has downlights
that suit all tastes and
applications**

Comprehensive Range

Haneco has several types of downlights in various finishes, so you are sure to find exactly what you want.

Easy to Install

With plug and play, inbuilt driver and rubberised clips to reduce damage to your cutout on most models, Haneco's downlights are easy to install. And if you have trouble with a cutout, adaptor rings for our popular lines have you covered.

Low Glare

We offer fixed and adjustable downlights with opal diffusers or clear lenses with reflectors. What they all have in common is good optical control and low glare.

Economical

All of our LED downlights outperform outdated conventional downlights with superior lumen output per watt, meaning they use much less power. They also have a longer life with less maintenance.

Most Popular Downlights

VIVA Multi - Switchable colour temperature

VIVA Multi's Tritone allows you to choose from three colour temperatures – convenient for both contractors and customers. And you can choose from three clip on trim finishes if white doesn't appeal.

AURORA Tritone - Slimline 9W or 12W

The slimline AURORA Tritone ranges have a recessed opal diffuser and you can choose from black, white or silver finishes. There are 9W and 12W switchable colour temperature Tritone models available.

STELLAR 60 - Adjustable accent range

The STELLAR 60 adjustable (30°) downlights are ideal for use in cabinets or for highlighting artwork. Also useful for circumstances that require a night light.

DETAIL - Aimable narrow beam

Safe with insulation (IC-4) and with some models featuring sealed ring housing, this adjustable clear lens downlight has excellent efficiency, a narrow 60° beam angle and ticks all the boxes for energy saving.

Accessories to Fit

Adaptor rings and clip-on trims

Size doesn't matter

A cutout that's too big is not necessarily a disaster with adaptor rings. Adaptor rings or conversion plates are designed to allow you to install a downlight that normally requires a small cutout into a larger cutout, eliminating the need for plastering and repainting. They are available to fit AURORA and VIVA.

Code	Fits	Cutout sizes	Diameter	Colour
TRIM-VIVA110-170-W	VIVA Multi	100 – 160mm	170mm	White
TRIM-VIVA110-130-W	VIVA Multi	100 – 120mm	130mm	White
TRIM-AURORAV2-170-W	AURORA Tritone	100 – 160mm	170mm	White
TRIM-AURORAV2-130-W	AURORA Tritone	100 – 120mm	130mm	White

Clip-on Trims

VIVA downlights come in a standard white finish but that is easily changed to black, brushed nickel or even gold. All you need do is attach a simple clip-on trim to change the original white trim to the colour of your choice.

Code	Fits	Colour
TRB-VIVA110	TRB-VIVA110	Black
TRN-VIVA110	TRB-VIVA110	Brushed Nickel
TRG-VIVA110	TRB-VIVA110	Gold
