

# DUO LED Dimming Switch

**Stylish dimming switch for  
complete ambience control**

## **LED compatible dimming**

The DUO Dimming Switch has been designed specifically to dim Haneco's compatible LEDs so you can be sure it will work as promised.

## **Integrated switch**

The switch is "two-in-one" simple press on and off dimming knob. The on/off function can be easily disabled to suit multi-way switching.

## **Smooth dimming**

Use of trailing edge dimming dims the light smoothly without any flickering. (As tested on all Haneco products)

## **Subtle backlight**

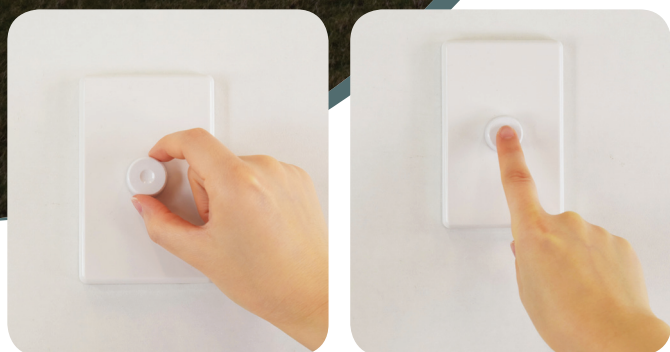

To make DUO easy to find in the dark, the switch is backlit in blue. If you don't want this feature it is easily disabled.

## **Easy installation**

The DUO dimming switch fits standard wall switch apertures and is compatible with most standard wall plates. Its very simple 2 wire design makes installation easy. It is also easy to mechanically set the minimum or maximum light levels via the dimming knob.

## **Capacity and flexibility**

The DUO has a 350W capacity and can control over thirty 10W downlights.

**Rotary LED dimmer with integrated push  
button on/off switch**
