

Outdoor LED Batten Range

Tough and durable TRIPROOF, DURALITE & SENTRY

Choose intensity and colour temperature

TRIPROOF models have a choice of 3 colour temperatures and 2 intensities so that there are fewer versions cluttering up wholesalers' shelves or contractors' vans. The same applies to DURALITE, which has a choice of colour temperatures and intensities on most models.

Smart Features

Both DURALITE and TRIPROOF models feature Emergency, a self-charging battery kit that keeps the light on low for 3 hours during a blackout. The occupancy sensor Intellisensor can be programmed to ensure that the lights are dimmed when no-one is around. Intellisensor is a feature only available with TRIPROOF.

Energy Efficient

All Haneco's LED battens deliver markedly better energy efficiency than fluorescents and have at least five times the lifespan. This is backed up by the accreditation of several models of TRIPROOF in the government energy savings schemes **VEET**, **REES** and **IPART**.

Long list of applications

TRIPROOF, DURALITE & SENTRY can find a place in sports halls, schools, car parks, stairwells, public amenities and a range of industrial spaces. With its HACCP approval, TRIPROOF can also be used in commercial kitchens.

Outdoor TRIPROOF

TRIPROOF offers smart options in several combinations

With a 1-10V dimming model that supports the daylight harvesting sensor Sunmax, emergency batteries, Intellisensor occupancy sensor and dual intensity, TRIPROOF is a seriously versatile batten.

A real outdoor type

DURALITE loves the outdoors

Besides being weatherproof and made of durable polycarbonate, the DURALITE range offers two colour temperatures on the same unit so that you can choose between 4000K neutral white or 5000K cool white. The 1200mm models double these options with a choice between two intensities – 18W or a powerful 36W. You can have bright and white or not so bright and not so white.

Features

- Rated IP66 to take any weather
- Stainless steel clips
- Very sturdy IK09
- Dual colour temperature selection
- Dual intensity on larger models
- Lithium iron phosphate battery
- Emergency models available
- 4 year warranty

Vandal Resistant LED Batten

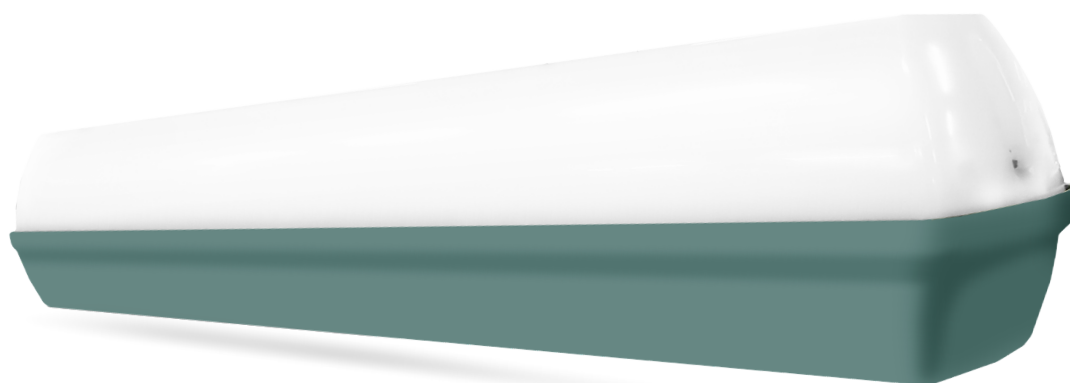

Light to guard the way

SENTRY is a practical LED security light

SENTRY is a sturdy outdoor (IP54) LED batten that's ideal for use as a security light. It has a vandal resistant impact rating and the right level of illumination for areas that don't need overly bright light, such as the exteriors of industrial buildings and places that you'd prefer not to be completely dark.

This 12 Watt Tritone outdoor LED batten has an ABS body and Polycarbonate diffuser with a lamp that is rated to endure for 50,000 hours.
